

# Invite a guest from the call screen

## Quickstart for service providers

Use this guide when you realise during a call that you need to involve an additional person

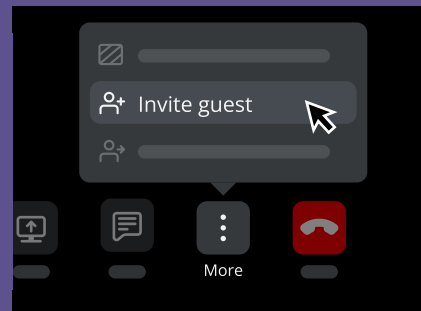

1

Start the call with your service user as normal

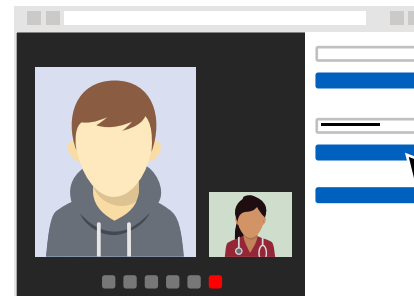

2

From the call screen, select **More > Invite guest**

3

Enter a mobile phone number or email address to send a one-time link to your guest

4

When the guest opens the link and enters their details, they immediately join your call
