Set up MFA in Attend Anywhere

Quickstart guide for service providers who want to use **Google Authenticator** on their **iPhone**. You'll need an Attend Anywhere account on your computer and an Apple iPhone.

On your iPhone, install <u>Google</u> <u>Authenticator</u> app from the App Store.

Open the app and skip the first 2 screens until you see **Add a code**

09:41
Image: Complexity of the second sec

On you iPhone, in Google Authenticator, tap the **Create** button.

If you cannot see the button, tap **Add a code**.

Next, tap **Scan a QR code**.

Point your phone at the Attend Anywhere QR code on your computer screen. Position the code inside the scan box.

Google Authenticator adds a new account for Attend Anywhere.

The app shows a 6-digit security code which is only valid for 30 seconds. Each time you sign in (and in the next step), you'll use a code.

On your computer, add the code to **Enter the 6-digit code** and click **Continue**.

Enter the 6-digit code
